IN THE CLAIMS

The claims are not amended, but are repeated here for reference in examination:

1. A computer-implemented method for managing patent and trademark fees comprising:
inputting identification information for a matter of a client of a firm and a requested fee
associated with the matter for payment to an agency as data representing the identification
information into a computer workstation;

issuing a charge for the requested fee at the computer workstation for transmittal to the
agency, the charge payable against an account maintained by an organization separate from the
firm for the client, the account initially funded by the client such that the account has a positive
balance; and,

generating a client invoice including the charge for the requested fee to replenish the
account maintained by the organization so that upon payment by the client the account
continually retains a positive balance.

2. The method of claim 1, further comprising:

receiving notice of an event for the matter of the client of the firm that will require a
second fee associated with the matter for payment to the agency by a due date;

generating a second client invoice including a charge for the requested fee to pre-fund the
account maintained by the organization such that upon payment by the client prior to the due date
